

Cathy Cupitt, Jane Grellier and Helen Rogers

This project will create a digital archive of oral presentation exemplars, drawn from the best presentations given by communications skills students in semester 2, 2009. For purposes of comparison, student actors will perform a range of adapted presentations based on these best practice examples, designed to demonstrate lower levels of achievement. Annotations on the videos will link these performances to marking criteria and suggest appropriate feedback. Both students and staff will have access to the exemplars in the Digital Archive.

Following the appointment of Liam Lynch as Project Officer, emails were sent to Science Communication Skills teaching staff requesting contact details of groups of students predicted to be the best teams at oral presentation. Filming will take place on 28<sup>th</sup> October and the week of the 23<sup>rd</sup> November 2009. Zoran Gacik of OTL will be undertaking the filming and the initial editing. Bruce Ridley of the Legal and Compliance Office is designing a release form for student participants. Carl Dreher of Eaglesemantics at CBS is heading up the design of the software tool which will deliver the presentations.
