The aim of the project is to establish a consistent moderation procedure as part of the quality assurance processes at Curtin Sarawak which is manageable by Schools within the campus and between campuses.

To date, the four Schools at Curtin Sarawak have made statements of how moderation occurs in each of the Schools. Each School has a Moderation Standard Operating Procedure exemplifying the cyclic model in *A Guide to Moderation, Scaling and Curtin's Quality Assessment Cycle*. At forthcoming workshops, the procedures in each School will be reviewed for consistency of process across the Campus. The major milestone to be achieved is to gain consistency with various counterparts at the Bentley campus.
